

InsurMatch Business Proposal

B2B SaaS CRM for Independent Insurance Agents

InsurMatch is a web-based Customer Relationship Management platform designed for Licensed Independent Insurance Agents and small insurance agencies in the United States. The platform centralizes customer data, lead management, contract information, renewal reminders, communication workflows, and business reporting in one system.

The proposal is to launch InsurMatch as a subscription-based SaaS product that helps insurance professionals replace fragmented spreadsheets, emails, personal notes, and disconnected tools with a structured daily workflow.

1. Executive Summary

Independent insurance agents often manage customer records, policy-related information, renewal dates, appointments, follow-up tasks, and revenue-related records manually. As an agent's customer portfolio grows, information becomes harder to find, important renewals may be missed, and daily work becomes dependent on spreadsheets and personal memory.

InsurMatch addresses this problem through a specialized CRM platform built around the actual workflow of independent insurance agents:

Customer Data

Lead and CRM Pipeline

Tasks, Reminders, and Follow-ups

Renewal and Appointment Tracking

Business Visibility and Analytics

The company will operate as a B2B SaaS provider. Licensed insurance agents and agencies will pay a monthly or annual subscription fee directly to InsurMatch for access to the software. InsurMatch will not sell insurance, provide insurance advice, receive premiums, or receive insurance commissions.

The initial market focus is the United States, particularly independent agents and small agencies operating in Medicare, Affordable Care Act marketplace health insurance, and

other health-insurance-related segments. The initial goal is to validate the MVP with early users, improve product-market fit, and establish recurring subscription revenue.

2. Problem Statement

Fragmented **customer management**

Independent insurance agents commonly use several disconnected tools to run their daily operations:

- Excel files and spreadsheets for customer information.
- Email inboxes for customer communication.
- Personal notes for appointments and follow-up activities.
- Calendars for renewal deadlines.
- Separate systems or manual records for commission-related visibility.
- Multiple messaging tools for customer reminders.

This workflow may be manageable for a new agent with a small number of customers. However, it becomes inefficient and risky when the customer portfolio grows to 100, 200, or more active customers.

Core **operational challenges**

Challenge	Current situation	Business impact
Customer records	Information is distributed across spreadsheets, email, notes, and multiple software tools	Slow access to customer information and inconsistent data
Lead tracking	Leads may not have clear ownership, status, or follow-up history	Lost sales opportunities and poor conversion visibility
Renewal management	Renewal dates are tracked manually or remembered by the agent	Risk of missed renewal opportunities and lower customer retention
Follow-up workflow	Agents rely on memory or personal reminders	Delayed response times and inconsistent service
Team coordination	Agency information may be stored separately by each agent	Limited management visibility and duplicated effort

Business reporting	Performance data is not available in one dashboard	Difficulty understanding workload, customer pipeline, and revenue activity
--------------------	--	--

The fundamental problem is not simply that agents lack a place to store data. The larger issue is that their business process remains manual even as the number of customers, policies, tasks, and interactions increases.

3. Proposed Solution

InsurMatch **CRM platform**

InsurMatch provides one centralized workspace for the key activities of an independent insurance agent or small agency.

The platform is designed to help users answer four practical questions each day:

- **Who** needs attention today?
- **What** customer, lead, contract, or follow-up activity requires action?
- **When** is a renewal, appointment, or deadline approaching?
- **How** is the agent or agency performing operationally?

Core **product capabilities**

Module	Primary functions	Customer value
Customer management	Centralized profiles, contact information, notes, interaction history, tags, and customer status	Provides a complete customer view in one location
Lead management	Lead capture, source tracking, assignment, qualification status, and follow-up tasks	Helps agents avoid losing prospects and improve response speed
CRM pipeline	Customizable stages for leads, prospects, customers, and service workflows	Makes the sales and service process visible and measurable
Calendar and reminders	Appointments, renewal dates, tasks, notifications, and follow-up reminders	Reduces missed deadlines and manual memory-based work

Email and SMS automation	Templates, scheduled reminders, follow-up sequences, and communication history	Supports consistent customer engagement at scale
Analytics dashboard	Pipeline overview, workload tracking, customer activity, renewal monitoring, and performance reporting	Enables data-informed business decisions
Team management	User roles, permissions, record ownership, task assignment, and shared visibility	Supports agencies with multiple agents and staff members
Commission visibility tools	User-entered or integrated commission-related tracking and reporting features	Helps agents organize business-performance information without handling insurance payments

Core **user workflow**

Log in

View today's priorities

Identify pending leads, follow-ups, renewals, and appointments

Search or filter customer records

Update customer, lead, or contract-related information

Complete follow-up activities

Review pipeline and operational dashboard

The objective is to reduce the distance between finding information and taking action.

4. Target Market

Primary **customer segment**

The primary target market is Licensed Independent Insurance Agents in the United States.

These users commonly:

- Manage their own customer portfolio.
- Handle leads, appointments, renewals, and ongoing customer service.
- Use spreadsheets or generic CRM systems.
- Need a simple workflow rather than a complex enterprise platform.
- Require fast access to customer and policy-related information.
- Want reminders for follow-up, renewal, and appointment activities.
- Need better visibility into day-to-day business operations.

A typical initial persona may be an independent agent with 200 or more active customers, multiple active contracts or policies, recurring follow-up obligations, and limited administrative support.

Secondary **customer segment**

The secondary market is small and medium insurance agencies with multiple agents.

These agencies need:

- Centralized customer and lead data.
- Shared workflow standards.
- User access controls and role permissions.
- Agent-level activity visibility.
- Team calendars and task assignment.
- Management dashboards.
- Consistent customer service processes.

Market **positioning**

InsurMatch will position itself as a focused CRM platform for independent insurance professionals rather than a general-purpose sales CRM.

General CRM tools	InsurMatch
Built for broad industries	Built around insurance-agent workflow
Often require substantial setup and customization	Designed for faster implementation and simple daily use
May prioritize generic sales pipelines	Combines leads, customer service, renewals, appointments, and follow-up workflows
Can be complex for individual agents	Intended to be accessible for individual agents and small teams
May not emphasize renewal-driven customer service	Includes renewal and reminder workflow as a core product capability

5. Business Model

Subscription-based SaaS model

InsurMatch earns revenue from monthly and annual subscriptions. Customers pay InsurMatch directly for continued access to the web-based CRM platform.

The company does not earn revenue from insurance-policy sales, premiums, carrier commissions, or agent commissions.

Monthly Recurring Revenue (MRR)= $\sum$ Monthly Subscription Revenue from Active Customers
 $\text{Monthly Recurring Revenue (MRR)} = \sum \text{Monthly Subscription Revenue from Active Customers}$

Annual Recurring Revenue (ARR)= $\text{MRR} \times 12$
 $\text{Annual Recurring Revenue (ARR)} = \text{MRR} \times 12$

This model supports predictable revenue, scalable customer acquisition, and expansion opportunities as users grow from individual-agent plans to team-based agency plans.

Proposed pricing model

Feature	Starter	Professional	Agency
Monthly price	USD 39	USD 79	USD 199
Target customer	Individual agent	Growing agent or small team	Multi-agent insurance agency
Maximum users	1 user	Up to 3 users	Up to 10 users
Lead management	Basic	Advanced	Shared team lead assignment
CRM pipeline	Standard pipeline	Customizable pipeline	Multiple team pipelines
Calendar and reminders	Basic reminders	Shared calendar and automated follow-up	Team calendar, task assignment, and oversight
SMS/email automation	Basic email templates	Email automation and limited SMS workflows	Advanced team automation and templates

Analytics dashboard	Individual activity overview	Pipeline and productivity reporting	Agency and agent-level operational reporting
Team management	Not included	Basic user access	Roles, permissions, and team oversight
Support	Standard email support	Priority email support	Priority support and onboarding assistance

Annual plans may be offered at a discount to encourage longer commitments, improve cash flow, and increase customer retention.

6. Customer Acquisition Strategy

Acquisition **channels**

InsurMatch will use a combination of direct and digital acquisition channels:

- Industry referrals from insurance professionals.
- Social-media content focused on agent productivity and CRM best practices.
- Educational webinars for independent insurance agents.
- Search-engine marketing and content marketing.
- Partnerships with training groups, professional communities, and insurance-industry service providers.
- Direct outreach to independent agents and small agencies.
- Referral incentives for existing subscribers.
- Free product demonstrations and trial conversion campaigns.

Customer **purchase journey**

Agent discovers InsurMatch

Books a free demo

Receives a needs-based product demonstration

Starts a 14-day free trial

Activates core workflows

Selects a subscription package

↓
Pays online
↓
Account is activated
↓
Subscription renews monthly or annually

Stage	Customer experience	InsurMatch objective
Discovery	Agent learns about InsurMatch through content, referrals, outreach, or advertising	Generate relevant awareness among the target market
Free demo	Agent schedules a product demonstration	Understand the agent's current workflow and present relevant features
Trial activation	Agent receives a 14-day trial workspace	Allow the prospect to evaluate product usefulness before payment
Onboarding	Agent imports or creates customer data, tasks, reminders, and pipeline stages	Help the user experience value quickly
Subscription decision	Agent selects Starter, Professional, or Agency	Convert trial user into a paying customer
Online payment	Agent enters payment details and confirms recurring billing	Collect subscription revenue securely
Renewal and retention	Subscription renews automatically unless cancelled	Maintain recurring revenue and reduce manual collection effort
Expansion	Customer upgrades plan or adds users as needs increase	Increase customer lifetime value and average revenue per account

Key **activation** metrics

During the 14-day free trial, InsurMatch should encourage customers to complete meaningful actions:

- Add at least five customer or lead records.
- Create a follow-up task.
- Add an appointment or renewal reminder.
- Move at least one lead through the CRM pipeline.
- View the dashboard.

- Send or schedule one compliant customer communication.
- Invite another team member, where applicable.

A trial user who completes these actions is more likely to understand the product's value and convert into a paid subscriber.

7. Go-to-Market Plan

Phase 1: MVP validation

The first phase focuses on launching an MVP to a small, carefully selected group of independent agents.

Initial MVP capabilities:

- Customer management.
- Lead tracking.
- CRM pipeline.
- Calendar and follow-up reminders.
- Renewal tracking.
- Basic dashboard.
- Basic email communication tools.
- Secure user authentication.
- Subscription billing.

The primary objective is to validate whether agents will consistently use the platform to manage daily customer and follow-up work.

Phase 2: Early commercial growth

After MVP validation, InsurMatch will focus on customer conversion, retention, and initial expansion revenue.

Priorities include:

- Improve onboarding experience.
- Introduce Professional and Agency packages.
- Add automation templates.
- Improve dashboard reporting.
- Develop customer referral programs.
- Build sales processes for demos and trial conversion.
- Measure churn, trial conversion, and user engagement.
- Refine pricing based on customer feedback.

Phase 3: Scalable agency platform

After demonstrating repeatable customer acquisition and retention, InsurMatch can expand its agency-oriented capabilities.

Potential developments include:

- Advanced role-based access controls.
- Shared customer ownership and agent assignment.
- Advanced reporting and management dashboards.
- API integrations with approved third-party systems.
- Workflow automation enhancements.
- AI-assisted customer-care content and task prioritization.
- Data synchronization with approved insurance-industry partners, subject to legal, technical, privacy, and commercial review.

8. Operational Model

Core **operating workflow**

Key internal responsibilities

Function	Core responsibilities
Product and engineering	Build, maintain, secure, and improve the web CRM platform
Sales	Generate leads, conduct demos, convert trial users, and support upsells

Customer success	Onboard users, improve adoption, reduce churn, and collect feedback
Marketing	Generate awareness, create content, run campaigns, and support lead generation
Billing and finance	Process subscription payments, issue invoices, manage refunds, reconcile revenue, and approve sales commissions
Compliance and data security	Maintain privacy controls, user-consent processes, access permissions, terms of service, and applicable data-protection practices

9. Financial Illustration

The following scenario demonstrates potential monthly recurring revenue under the proposed pricing model.

Assumptions

Customer segment	Number of customers	Monthly price
Starter	20	USD 39
Professional	15	USD 79
Agency	5	USD 199

Monthly recurring revenue

Package	Customers	Monthly price	Calculation	Monthly revenue
Starter	20	USD 39	20×39	USD 780
Professional	15	USD 79	15×79	USD 1,185
Agency	5	USD 199	5×199	USD 995
Total MRR	40	—	$780 + 1,185 + 995$	USD 2,960

Initial sales commission expense

Package	New customers	Commission per customer	Total sales commission
Starter	20	USD 3.90	USD 78.00
Professional	15	USD 9.48	USD 142.20
Agency	5	USD 29.85	USD 149.25
Total sales commission	40	—	USD 369.45

Revenue **after acquisition commission**

Metric	Amount
Monthly recurring revenue	USD 2,960.00
Less: first-month sales commission expense	USD 369.45
Revenue after sales commission	USD 2,590.55
Annual recurring revenue	USD 35,520.00

This example does not represent net profit. Future financial planning must deduct cloud hosting, payment-processing charges, product development, employee costs, marketing, customer support, data security, legal services, taxes, and administrative expenses.

11. Key Success Metrics

To manage performance during the launch period, InsurMatch should track the following metrics.

Metric	Definition	Why it matters
Website visitor-to-demo rate	Percentage of visitors who book a demo	Measures marketing-message effectiveness
Demo-to-trial conversion rate	Percentage of demos that activate a free trial	Measures sales qualification and product interest
Trial-to-paid conversion rate	Percentage of trials that become paying subscribers	Measures onboarding and product-market fit

Monthly recurring revenue	Total monthly subscription revenue from active accounts	Core recurring-revenue metric
Annual recurring revenue	MRR multiplied by 12	Shows annualized subscription scale
Customer acquisition cost	Sales and marketing cost required to acquire one paying customer	Measures efficiency of growth investment
Customer churn rate	Percentage of paying customers who cancel during a period	Indicates retention and product value
Net revenue retention	Revenue retained and expanded from existing customers	Measures growth from the customer base
Average revenue per account	Average subscription revenue per active customer account	Tracks success of pricing and upselling
Activation rate	Percentage of trial users who complete key onboarding actions	Indicates likelihood of trial conversion
Customer support response time	Average time taken to respond to customer issues	Influences user satisfaction and retention

12. Compliance and Risk Management

Business-model boundary

InsurMatch is a technology service provider. The company's revenue comes exclusively from subscription payments for CRM software access.

Licensed Insurance Agent

Provides licensed insurance services

May receive insurance-related compensation from authorized parties

InsurMatch

Provides CRM and workflow software

Receives SaaS subscription fees only

Pays internal software-sales commissions only

Compliance commitments

InsurMatch will maintain the following boundaries:

- The platform will not sell, bind, quote, issue, or underwrite insurance products.
- InsurMatch will not provide insurance recommendations or insurance advice.
- InsurMatch will not collect, hold, or transmit insurance premiums.
- InsurMatch will not receive, share, or distribute insurance-policy commissions.
- Licensed agents remain responsible for their own licensing, insurance recommendations, customer disclosures, and regulatory obligations.
- Internal sales commissions relate solely to InsurMatch software subscriptions.
- The company will establish clear terms of service, privacy policies, data-access permissions, and customer-consent controls.
- Any SMS or email automation will require appropriate consent, opt-out mechanisms, and compliance review.
- Any future integration with carriers, FMOs, or other insurance-industry systems will be subject to legal, privacy, security, and contractual assessment.

Because InsurMatch may store sensitive customer information, the company should apply strong security practices, including encrypted data transmission, role-based access controls, multi-factor authentication, secure password standards, audit logs, regular backups, and controlled access to customer records.

Chi phí vận hành hàng tháng

Chi phí cố định hàng tháng

Các khoản này vẫn phát sinh ngay cả khi InsurMatch mới có rất ít khách hàng.

Hạng mục	Mô tả	Giai đoạn MVP	Khi bắt đầu tăng trưởng
Cloud hosting & application server	Server chạy web application, API, background jobs	30–100 USD	150–600 USD
Database	Managed database, backup, replication cơ bản	25–80 USD	100–500 USD
File storage & backup	Lưu file, document, export, backup dữ liệu	10–30 USD	50–250 USD
Monitoring & error tracking	Uptime monitoring, logs, error tracking	0–50 USD	50–250 USD
Domain, SSL, email domain	Domain, DNS, transactional domain setup	5–25 USD	20–80 USD
Product tools	Design tool, project management, internal communication	20–100 USD	100–400 USD
Accounting & administration	Bookkeeping, tax filing tools, legal administration	50–200 USD	200–800 USD
Security & compliance tools	Password manager, vulnerability scanning, backup/security tools	20–100 USD	150–1.000 USD
Customer support tool	Ticket system, knowledge base, chat widget	0–50 USD	50–300 USD

Tổng chi phí cố định/tháng	Không bao gồm lương	160–735 USD	870–4.180 USD
-----------------------------------	---------------------	--------------------	----------------------

Chi phí nhân sự hàng tháng

Đây thường là nhóm chi phí lớn nhất khi InsurMatch vận hành như một công ty thật.

Vai trò	Giai đoạn MVP	Giai đoạn tăng trưởng	Vai trò chính
Founder/Product Owner	Có thể chưa nhận lương hoặc nhận mức tối thiểu	2.000–6.000 USD	Product strategy, customer discovery, prioritization
Full-stack developer	1.500–4.000 USD outsourced/part-time	4.000–10.000 USD	Phát triển và bảo trì sản phẩm
UI/UX designer	300–1.000 USD part-time	2.000–5.000 USD	Thiết kế trải nghiệm người dùng
QA tester	200–800 USD part-time	1.500–4.000 USD	Kiểm thử chất lượng
Customer support / onboarding	Founder xử lý ban đầu	2.000–4.500 USD	Setup account, hỗ trợ người dùng
Sales / growth	Founder-led	2.000–6.000 USD + marketing	Demo, conversion, partnership
Compliance/legal consultant	Theo nhu cầu	500–3.000 USD	Privacy, contracts, security review
